Executive Summary

Senior Software Engineer and Tech Lead with 9+ years building scalable web applications and data-intensive systems, including 3+ years leading search and discovery features at Upwork used by millions. Expertise in full-stack development (Python, JavaScript/TypeScript, Vue.js, React, Node.js, GraphQL) with a focus on search, ranking, and AI/ML-ready architectures. Proven track record shipping high-impact features, optimizing performance, and mentoring engineering teams in remote-first environments. Currently specializing in search engineering, distributed systems, and integrating ML-driven recommendations into production platforms.

Experience

Upwork, Senior Frontend Developer - Marketplace Engineering

May 2022 - Present

- Led end-to-end development of search and discovery features in Jobs and Freelancers marketplace, serving 800K+ monthly active users with Vue.js, Python, and GraphQL
- Designed and built data-aware frontend layers and GraphQL services, architecting migration from legacy PHP backend to modern microservices, improving system observability and reducing API response time by 35%
- Acted as tech lead for cross-team projects, partnering with Product, Design, and Data Analytics teams to shape roadmap, define A/B testing strategies, and iterate on search relevance based on user behavior metrics
- Implemented comprehensive monitoring and observability using AWS CloudWatch, Datadog, and custom dashboards, achieving 99.9% uptime and reducing incident response time by 40%
- Mentored 5+ engineers on modern JavaScript frameworks (React, Vue, TypeScript), code quality practices, and system design, with 2 mentees promoted to senior roles
- Applied best practices for code quality, CI/CD pipelines, and deployment processes, contributing to the efficiency and stability of development workflows.

Intuit, Senior Software Engineer

(Jun 2019 - Dec 2020 Contractor) - (Nov 2021 - March 2022 Full-time employee)

- Developed a web application as part of the data curation team using JavaScript, Node.js, and React.js.
- Integrated internal systems and external providers with the platform using GraphQL as both server and client.

- Created charts for static and real-time data visualizations, enhancing data presentation and user interaction.
- Performed code reviews and provided mentorship to team members, promoting best practices and continuous improvement.
- Wrote unit and end-to-end (e2e) test cases using Jest and Cypress frameworks, ensuring high code quality and reliability.
- Collaborated with the backend team on proof-of-concept projects to enhance the data curation application.
- Delivered extensible and maintainable code as part of a team, adhering to industry standards and best practices.
- Excelled in rapidly prototyping new capabilities to assess and confirm project feasibility.
- Tested, maintained, and recommended software improvements to ensure strong functionality, performance, and optimization.

Number8, Frontend Developer (Contractor)

Jan 2021 - Oct 2021

- Developed a comprehensive financial application using JavaScript, Node.js, React.js, and GraphQL.
- Led the implementation of TypeScript within the React framework, enhancing code quality and development efficiency.
- Created dynamic charts for data visualization, providing users with insightful and interactive data representations.
- Maintained clear and regular communication with management and technical support colleagues to ensure project alignment and timely updates.
- Experimented with multiple design iterations to refine application features and improve user experience.
- Contributed to writing extensible and maintainable code by developing unit and end-to-end (e2e) test cases, ensuring high code quality and reliability.
- Excelled in rapidly prototyping new capabilities to assess and confirm project feasibility.
- Tested, maintained, and recommended software improvements to ensure optimal functionality and performance.

Origami Logic, Frontend Developer (Contractor)

Nov 2018 - Jun 2019, Remote

- Maintained a JavaScript application using Vanilla Javascript, ensuring code quality and application performance.
- Developed new functionalities using React, TypeScript, APIs, and GraphQL, enhancing the application's capabilities.
- Led the implementation of TypeScript for new and existing codebases, improving code maintainability and developer productivity.
- Developed and enhanced charts for data visualization using D3.js, providing users with detailed and interactive data insights.
- Maintained the mobile application using React Native, ensuring a seamless user experience across platforms.
- Developed new backend functionalities using Python and Django, supporting the application's growing feature set and improving server-side performance.

Dom & Tom, Full Stack Developer (Contractor)

May 2017 - Nov 2018, Remote

- Full Stack Developer
- Developed Web Applications for different projects using Laravel, NodeJS, ReactJS, GraphQL, Prisma, Couchbase, Docker.
- Ensured technical and functional designs meet business requirements.
- Implemented project design, standards, and processes.
- Collaborated with executive management to recommend system solutions.

Freelance, Full Stack Developer

May 2015 - May 2016

- Designed and developed applications, especially VoIP applications.
- Provided technology consulting to external customers and internal project teams.
- Verified and implemented detailed technical design solution to the problem as identified by the Technical Project Manager.
- Created and maintained effective customer relationships so as to ensure customer satisfaction.
- Assisted with implementation of project architecture, standards, and processes.
- Researched, identified and documented the client's technical requirements.
- Developed and documented system architecture.
- Created data flows and database schemas.

Palosanto Solutions, IT Specialist - Software Developer

May 2015 - May 2016

- Asterisk & VoIP engineer.
- DevOps.
- Developed Web Applications for different projects using PHP, AngularJS, EmberJS.

Education - Licenses & Certifications

Escuela Politécnica Nacional, Engineer's degree, Electronics

2015 - 2011, Quito - Ecuador

AWS, AWS Certified AI Practitioner

Oct 2025

[Credential ID](#)

Zend by Rogue Wave Software, Zend Certified PHP Engineer

May 2014

Credential ID ZEND024675

Amazon, AWS Certified Solutions Architect - Associate

Sep 2018

Credential ID Y2N9QX612BEE1VGL

Linux Professional Institute, LPIC-2

May 2012

Credential ID LPI000250750

Technical Skills

Languages: Python, JavaScript/TypeScript, GoLang, PHP, Ruby

Frontend: React, Vue.js (2/3), Nuxt.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Django, Express, GraphQL, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Couchbase, Redis, ElasticSearch

Cloud & DevOps: AWS (CloudWatch, Lambda), Docker, CI/CD Pipelines

Testing: Jest, Cypress, Playwright, Vitest

Tools & Methodologies: Git, Agile/Scrum, TDD, Code Reviews, System Design

Mobile: React Native, Ionic, Flutter

Languages

-
- Spanish (Native)
 - English (Professional)
